

# CSS with LPEG

Work-in-progress toward a complete  
CSS parser for HTML processing

**what is it about?**

**software**

# Background – current situation

The screenshot shows a web-based document editor. The top navigation bar includes 'Home', 'Dossier content', and 'Document text'. The main editing area is titled 'Edit document text :'. On the left, there is a 'Collapse' button. The document content includes a heading 'Rapport', a rich text editor toolbar, and the following text:

**My introduction text**

Location	12:30	13:00
Quallgraf	Meeting A	
DocWolves		Meeting B

**Present:**

- Charles
- Paul
- Els

On the right side, there is a 'Comments' panel with a comment from 'Monique Arensman' (now) stating 'Still relevant'. At the top right of the editor, there are buttons for 'Import', 'Save & Preview', and 'Save'.
